- Black, Dark Bronze, White, Gray, or Natural Aluminum standard. Consult factory for other finishes.
- Specified output code set at the factory set. Includes fixture mounted output selector that enables field adjustable light levels.
- Flush mounted enhanced back light shield, factory installed.
- No field adjustable output. Specified output code set at the factory.
- Includes output selector that enables field adjustability of light levels. Field changeable connectors included to enable dimming connection to PCR7 (wireless node dimming is disabled by default).
- Control-ready wired at factory for wireless node dimming. Output selector not included in fixture. Not able to adjust above specified drive current.
- See L7 or L3 Lens coverage details on page 4. Consult factory for MS specified with ANSI 7-wire Photocontrol Receptacle. PCR option is required for On/Off control using light detection.
- For PND profile options see page 5. Only available with MV (120-277V).
- Specify Color (GY, DB, BK, WH, NA)
- Specify MV (120-277V) or HV (347V-480V)

Accessories*	
<b>BLS</b>	Enhanced Back Light Shield
<b>RPA<sup>9</sup></b>	Round Pole Adapter
<b>PTF1<sup>9</sup></b>	Square Pole Top Fitter Single
<b>PTF2<sup>9</sup></b>	Square Pole Top Fitter Twin at 180°
<b>PTF4<sup>9</sup></b>	Square Pole Top Fitter Quad
<b>WM<sup>9</sup></b>	Wall Mount
<b>BSK</b>	Bird Deterrent Spider Kit
<b>LLPC<sup>10</sup></b>	Long-Life Twist Lock Photocontrol
<b>SC</b>	Twist Lock Shorting Cap
<b>FSIR100</b>	Motion Sensor Configuration Tool

\*Accessories are ordered separately and not to be included in the catalog number

### Luminaire Specifications

#### Housing

Die cast aluminum housing with universal mounting design allows for attachment to existing pole without drilling for retrofit applications. Aluminum housing provides passive heat-sinking of the LEDs and has upper surfaces that shed precipitation. Mounting provisions meet 3G vibration per ANSI C136.31-2010 Normal Application, Bridge & Overpass. Electrical components are accessed without tools and are mounted on removable power door.

#### Light Emitting Diodes

Hi-flux/Hi-power white LEDs produce a minimum of 90% of initial intensity at 100,000 hours of life based on IES TM-21. LEDs are tested in accordance with IES LM-80 testing procedures. LEDs have correlated color temperature of 3000K, 4000K, or 5000K and 70 CRI minimum. LEDs are 100% mercury and lead free.

#### Field Adjustability

An output selector is supplied to adjust light output for local conditions (not available with PCR7-CR option). The specified output code will be factory set.

#### Quality Control

Every luminaire is performance tested before and after a 2-hour burn-in period. Assembled in the USA.

#### Optical Systems

Micro-lens optical systems are fully sealed to maintain an IP66 rating. Luminaire produces 0% total lumens above 90° (BUG Rating, U=0). Auto Front Row (AFR) optics are designed to enhance light levels at site perimeter while minimizing wattage and backlight. Optional enhanced Back Light Shield (BLS) is designed to meet strict light trespass and LEED requirements. Optics may be rotated right or left with options ORR/ORL, respectively

#### Electrical

Rated life of electrical components is 100,000 hours. Uses isolated power supply that is 1-10V dimmable. Power supply is wired with quick-disconnect terminals. Power supply features a minimum power factor of .90 and <20% Total Harmonic Distortion (THD). EMC meets or exceeds FCC CFR Part 15. Terminal block accommodates 6 to 14 gauge wire. Standard surge protection complies with IEEE/ANSI C62.41 and ANSI C136.2-2015, Enhanced (10kV/5kA). SP2 option provides Extreme level (20kV/10kA).

#### Controls

3-Wire photocontrol receptacle (PCR) is available. ANSI C136.41 7-wire (PCR7) photocontrol receptacles are available. All photocontrol receptacles have tool-less rotatable bases. Wireless control module is provided by others.

#### Finish

Housing receives a fade and abrasion resistant polyester powder coat finish with 3.0 mil nominal thickness. Finish tested to withstand 5000 hours in salt spray exposure per ASTM B117. Finish meets scribe creepage rating 8 per ASTM D1654. Finish tested 500 hours in UV exposure per ASTM G154 and meets ASTM D523 gloss retention.

#### Listings/Ratings/Labels

Luminaires are UL listed for use in wet locations in the United States and Canada. DesignLights Consortium™ Premium Classification qualified product. International Dark Sky Association listed. Luminaire is qualified to operate at ambient temperatures of -40°C to 40°C.

#### Photometry

Luminaires photometrics are tested by certified independent testing laboratories in accordance with IES LM-79 testing procedures.

#### Warranty

10-year limited warranty is standard on luminaire and components. 5-year limited warranty on luminaires and components with a motion sensor.

#### Standards

Luminaire complies with:  
ANSI: C136.2, C136.3, C136.10, C136.13, C136.15, C136.22, C136.31, C136.35, C136.37, C136.41, C62.41, C78.377, C82.77  
Other: FCC 47 CFR, IEC 60598, ROHS II, UL 1449, UL 1598

### Performance Data 3000K

All data nominal. IES files are available at leotek.com.

LED Code	Output Code	Drive Current (mA)	System Wattage (W)	Delivered Lumens (Lm) <sup>1</sup>	Efficacy (Lm/W)	Field Adjustable Output Range <sup>2</sup>
<b>48N</b>	030	120	22	2970	135	↕

	200	1050	149	20600	138	

**Notes:**

1 Normal tolerance ± 10% due to factors including distribution type, LED bin variance, driver variance, and ambient temperatures.

2 Performance codes available in two ranges for adjustable output as shown in performance data tables. Output set at factory to specified performance code.

**Motion Sensor (Optional) Specifications**

**Description**

Digital passive infrared luminaire integrated outdoor occupancy sensor provides high/low/off control based on motion detection. Initial setup and subsequent sensor adjustments are made using a handheld configuration tool. PCR option is required for On/Off control using light detection. Available with both MV and HV input voltage options.

**Operation**

Standard factory setting will dim the luminaire to 50% until motion is sensed and then it will power to 100%. When motion is not detected for five minutes, the luminaire will dim back to 50%. Ramp up and fade down times are adjustable, but initially set to NONE. The percent dimming and time durations may be field adjusted as required using FSIR-100 configuration tool. FSIR-100 user guide available at: [www.wattstopper.com](http://www.wattstopper.com).

**Optical System**

Multi-cell, multi-tier Fresnel lens with a 360 degree view detects unobstructed motion within one mounting height, up to 20 ft. maximum (MSL3) or 40 ft. maximum (MSL7). Consult factory for higher mounting height requirements.

**Finish**

Sensor exterior ring and lens are white polycarbonate, UV and impact resistant.

**Listings/Ratings**

Sensor is TUV, UL and cUL listed, IP66 rated and CE compliant.

**Warranty**

5-year limited warranty on luminaires and components with a motion sensor.

**Part-Night Dimming Specifications**

**Description**

Arieta's Part-Night Dimming (PND) option enables significant energy savings by automatically dimming the luminaire during early morning hours when infrequent use is expected. Factory programmed dimming profiles automatically take into account seasonal changes based on geographical location by continuously monitoring the nighttime midpoint. PND does not provide power on/off control which is provided by external controls (example: time clock) or a photocontrol using PCR3 or PCR7 option. Dimming profile of PND option is not field adjustable.

**Operation**

Based on the PND profile that is selected, the luminaire dims to the corresponding % power for the corresponding length of time (based on the nighttime mid-point) as shown below. Mid-point is continuously recalculated in the luminaire by monitoring the average length of time between when the light turns on (power on) and turns off (power off) over the previous two days. In effect, this functionality will take two days to initialize after installation before any dimming will occur. Power interruptions are ignored and do not affect the determination of mid-point. A motion sensor (MSL3 or MSL7) can be used with PND to temporarily override the dimming profile when motion is detected. Three factory programmed PND profiles are available for selection:
