- 1 Black, Dark Bronze, White, Gray, or Natural Aluminum standard. Consult factory for other finishes. See page 2 for RAL codes of Standard finishes.
- 2 Specified output code is the factory set lumen performance. Refer to performance data table on page 3 of this spec sheet. Field adjustable current selector enables fixture to be changed in the field to adjust light output for local conditions (not available with Fixed Output Code (FOC) or PCR7-CR option). Consult factory if wattage limits require a special drive current.
- 3 No field adjustable output. Specified output code set at the factory.
- 4 Includes current selector that enables field adjustability of light levels. Includes connectors to allow easy upgrade of wireless dimming via PCR7. Wireless node by others.
- 5 Control-ready wired at factory for wireless node dimming. Output selector not included in fixture. Not able to adjust above specified drive current.
- 6 See L7 or L3 Lens coverage details on page 4. Consult factory for MS specified with ANSI 7-wire Photocontrol Receptacle. PCR7 option is required for On/Off control using light detection.
- 7 Standard surge protection, 10kV/5kA, fail-to-on, meets enhanced surge protection based on ANSI 136.25-2015 3-part test.
- 8 For PND profile options see page 5. Only available with MV (120-277V).
- 9 Specify Color (GY, DB, BK, WH, NA)
- 10 Specify MV (120-277V) or HV (347V-480V)

Accessories*	
RPA ⁹	Round Pole Adapter
PTF1 ⁹	Square Pole Top Fitter Single
PTF2 ⁹	Square Pole Top Fitter Twin at 180°
PTF4 ⁹	Square Pole Top Fitter Quad
WM ⁹	Wall Mount
BSK	Bird Deterrent Spider Kit
LLPC ¹⁰	Long-Life Twist Lock Photocontrol
SC	Twist Lock Shorting Cap
FSIR100	Motion Sensor Configuration Tool

*Accessories are ordered separately and not to be included in the catalog number

Luminaire Specifications

Housing

Die cast aluminum housing with universal mounting design allows for attachment to existing pole without redrilling for retrofit applications. Aluminum housing provides passive heat-sinking of the LEDs and has upper surfaces that shed precipitation. Mounting provisions meet 3G vibration per ANSI C136.31-2010 Normal Application, Bridge & Overpass. Electrical components are accessed without tools and are mounted on removable power door.

Light Emitting Diodes

LEDs produce nominal 85% of initial intensity at 60,000 hours of life per IES recommended lumen maintenance life projection based on 6 times the duration of the collected LM-80 data. For details on IESNA position on LED Product Lifetime Prediction, refer to PS-10-18. LEDs have correlated color temperature of 2700K (27K), 3000K (30K), 4000K (40K), and 70 CRI minimum. LEDs are ROHS compliant, 100% mercury and lead free.

Field Adjustability

LED lumen output can be changed in the field to adjust for local conditions (not available with PCR7-CR option). The specified output code will be the factory set output. Field adjustments can be made with the output selector included in the fixture. Field adjustable range shown in performance data table.

Quality Control

Every luminaire is performance tested before and after a 2-hour burn-in period.

Optical Systems

ComfortGuide's patented light panel is fully sealed (IP66 rated) and designed to create large uniform source luminance that provides less contrast between the light source and the dark sky background. The combination of uniform source luminance and lower contrast greatly reduces glare, improves visual comfort, and enhances the user experience.

Electrical

Rated life of electrical components is 100,000 hours. Uses isolated power supply that is 1-10V dimmable. Power supply is wired with quick-disconnect terminals. Power supply features a minimum power factor of .90 and <20% Total Harmonic Distortion (THD). EMC meets or exceeds FCC CFR Part 15. Terminal block accommodates 6 to 14 gauge wire. Standard surge protection complies with IEEE/ANSI C62.41 and ANSI C136.2-2015, Enhanced (10kV/5kA). SP2 option provides Extreme level (20kV/10kA).

Controls

ANSI C136.41 7-wire (PCR7) photocontrol receptacle is available. Photocontrol receptacle has a tool-less rotatable base. Wireless control module is provided by others.

Finish

Housing receives a fade and abrasion resistant polyester powder coat finish with 3.0 mil nominal thickness. Finish tested to withstand 5000 hours in salt spray exposure per ASTM B117. Finish meets scribe creepage rating 8 per ASTM D1654. Finish tested 500 hours in UV exposure per ASTM G154 and meets ASTM D523 gloss retention.

Listings/Ratings/Labels

luminaires are UL listed for use in wet locations in the United States and Canada. DesignLights Consortium™ Premium Classification qualified product. International Dark Sky Association listed. Luminaire is qualified to operate at ambient temperatures of -40°C to 40°C.

Photometry

Luminaire photometrics are tested by certified independent testing laboratories in accordance with IES LM-79 testing procedures.

Warranty

5-year limited warranty is standard on luminaire and components. 5-year limited warranty on luminaires and components with a motion sensor. See Leotek.com for warranty details

Vandal Resistance

Housing and optics rated to IK09

Standards

Luminaire complies with:
ANSI: C136.2, C136.3, C136.10, C136.13, C136.15, C136.22, C136.31, C136.35, C136.37, C136.41, C62.41, C78.377, C82.77
Other: FCC 47 CFR, IEC 60598, ROHS II, UL 1449, UL 1598

Color Specifications

Order Code	Color	RAL #	Pantone Equivalent
GY	Gray	7040	429C
BK	Black	9004	426C
DB	Dark Bronze	6022	BLACK 2C
WH	White	9003	11-0601
NA	Natural Aluminum	9006	N/A

Notes:

1 Normal tolerance $\pm 10\%$ due to factors including distribution type, LED bin variance, driver variance, and ambient temperatures.

2 Performance codes available in two ranges for adjustable output as shown in performance data tables. Output set at factory to specified performance code.

3 DLC approved at 120V and 240V.

Motion Sensor (Optional) Specifications

Description

Digital passive infrared luminaire integrated outdoor occupancy sensor provides high/low/off control based on motion detection. Initial setup and subsequent sensor adjustments are made using a handheld configuration tool. PCR option is required for On/Off control using light detection. Available with both MV and HV input voltage options.

Operation

Standard factory setting will dim the luminaire to 50% until motion is sensed and then it will power to 100%. When motion is not detected for five minutes, the luminaire will dim back to 50%. Ramp up and fade down times are adjustable, but initially set to NONE. The percent dimming and time durations may be field adjusted as required using FSIR-100 configuration tool. FSIR-100 user guide available at: www.wattstopper.com.

Optical System

Multi-cell, multi-tier Fresnel lens with a 360 degree view detects unobstructed motion within one mounting height, up to 20 ft. maximum (MSL3) or 40 ft. maximum (MSL7). Consult factory for higher mounting height requirements.

Finish

Sensor exterior ring and lens are white polycarbonate, UV and impact resistant.

Listings/Ratings

Sensor is TUV, UL and cUL listed, IP66 rated and CE compliant.

Warranty

5-year limited warranty on luminaires and components with a motion sensor.

Part-Night Dimming Specifications

Description

Arieta’s Part-Night Dimming (PND) option enables significant energy savings by automatically dimming the luminaire during early morning hours when infrequent use is expected. Factory programmed dimming profiles automatically take into account seasonal changes based on geographical location by continuously monitoring the nighttime midpoint. PND does not provide power on/off control which is provided by external controls (example: time clock) or a photocontrol using PCR3 or PCR7 option. Dimming profile of PND option is not field adjustable.

Operation

Based on the PND profile that is selected, the luminaire dims to the corresponding % power for the corresponding length of time (based on the nighttime mid-point) as shown below. Mid-point is continuously recalculated in the luminaire by monitoring the average length of time between when the light turns on (power on) and turns off (power off) over the previous two days. In effect, this functionality will take two days to initialize after installation before any dimming will occur. Power interruptions are ignored and do not affect the determination of mid-point. A motion sensor (MSL3 or MSL7) can be used with PND to temporarily override the dimming profile when motion is detected. Three factory programmed PND profiles are available for selection:
